

**HUBBELL CANADA INC.  
ALYTD06200R0051**

**Chance Line Tension Disconnects**

The Chance Line Tension Disconnects are single phase Hook-stick operated switches available for voltages up to 38kV, 200kV BIL and 600 amps continuous current. The ALTD Switches features lightweight ESP Insulators, low profile design, rigid copper blade, integral corona ring and rugged end fittings.

Now they are available with separate mechanical and electrical NEMA pads.

New Oilfilled Transformers ---IN STOCK!

New "TLO" Unit Substations

13.8kV and 27.6kV

New Station Class Transformers

44kV and 27.6 kV

New Padmount Transformers

27.6kV / 13.8kV / 4.16kV

Large "in stock" inventory on website

- New/New surplus/refurbished
- Oilfilled and dry type transformers
- High and low voltage switchgear

**FLIR SYSTEMS**  
Infrared Imaging Systems

FLIR Systems manufactures, sells, rents, calibrates and services infrared imaging systems in Canada.

FLIR Systems combines the strengths of AGEMA and Inframetrics to develop the premier Thermography Solution. The ThermaCAM PM 695 captures both thermal and visual images with autofocus and editable text messaging. After saving over 800 images, simply “drag-n-drop” file into Reporter analysis software and report is complete in seconds.

Please take advantage of our “First-Time” Rental Special. Rent a camera for two weeks and receive the third week at no charge.

Certification Training is available.

A combined initiative of

**AFFORDABLE DIGITAL POWER METER**

The ET3 three phase power transducer accurately measures over 20 electrical parameters. Its compact size and conduit ready enclosure allow for fast installation (no panel cut-out is required).

The ET3 is ideal for any SCADA or Energy Management System. It easily interfaces with a generic DDC/PLC via four analog outputs and with any RTU via RS485 Modbus. A remote graphic LCD display may be added to the unit.

**ACCESS CONTROL SALES  
Ingram Products, Inc.  
PSD30/60 Power Supplies**

Introducing from Ingram Products, a new series of DIN rail mount power supplies. The PSD Series available in a multitude of different wattage versions up to a 60-watt maximum.

Some of the most common applications this style of power supply is being used in, water treatment industry to power e.g. float switches, temperature transmitters and touch screens. Also the communications industry typically uses low voltage DC controls in transmission stations.

The most common reason for using a DC power supply to power equipment is due to the fact that e.g. at 5VDC to operate a float switch in a hazardous area theoretically one cannot get a spark.

For complete catalogue information on the PSD Series of power supplies please contact:
