

In Today's
Business Environment...

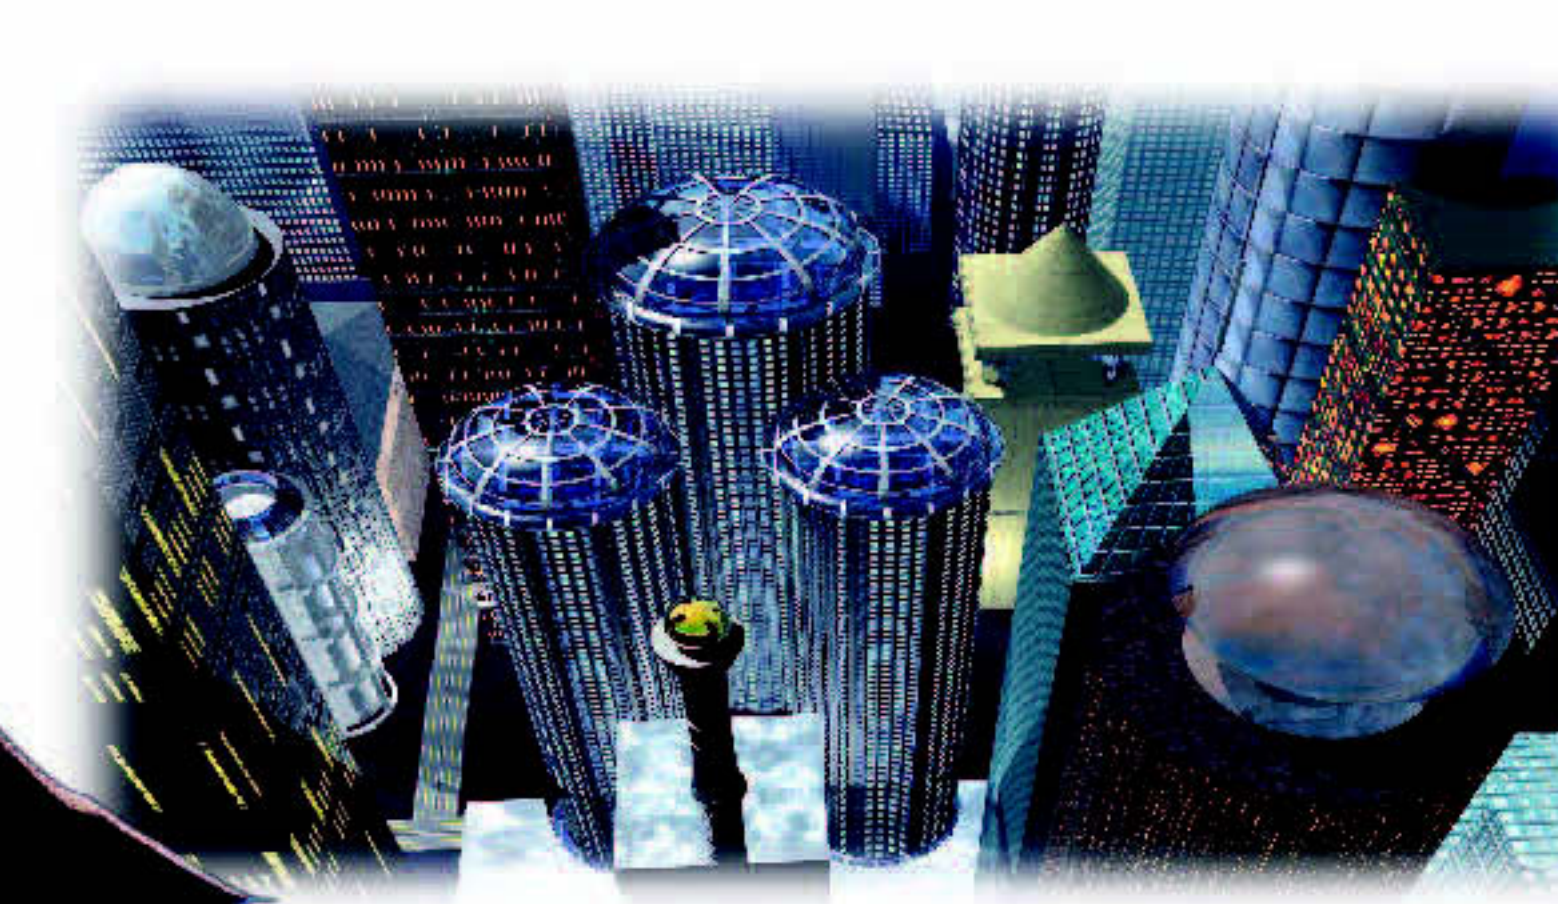

It's a **Rare Bird** That Grows
Bigger and Stronger
by the Day.

Portable Meter Base & Receptacle Monitoring Solutions

Made in America

When **Innovative** Power Quality **Ideas** Take Flight
The Future is Closer Than You Think.

Power Monitors, Inc. didn't achieve its lofty position as a leader in the power quality industry overnight. For more than fifteen years we've grown steadily, one innovative new product after another. From our shirt pocket-sized VP-2 single-phase recorder, to our top-of-the-line, eight-input, ViP digital recorder with real-time power and harmonics, PMI delivers a full range of monitoring and analytical solutions. Through the strength of our balance sheet, we're spreading our wings while others remain grounded. We're growing a global sales force, expanding our network of distribution centers, and bolstering our training, tech support and consulting capabilities. Additionally, we're exploring the exciting possibilities of Blue Tooth, Ethernet, and Web-based communications technologies for PMI's next generation of portable and permanent recorders. For more information on how PMI's exceptional people, products, and consulting services can take your commitment to power quality into the future, call 1-800-296-4120, or click on www.powermonitors.com today.

Power Monitors, Inc.
The Quality in Power Quality
