

HIGH VOLTAGE CAPACITORS

CONDIS

- › Grading and coupling capacitors for live tank, dead tank and GIS circuit breakers
- › Specialized coupling, charge and RC-Divider capacitors for high voltage laboratories
- › Capacitive voltage dividers for capacitor voltage transformers

With over 40 years of experience manufacturing high voltage capacitors, Maxwell Technologies SA is a world leader in the production of these parts. We offer a wide range of porcelain/composite insulated capacitors for external applications, capacitors designed for GIS applications, and specialized capacitors for testing and laboratory applications.

Our capacitors are manufactured according to strict guidelines and we are committed to having the latest mechanical, chemical and electrical know-how. This, combined with the excellent performance of our highly automated production lines, ensures that every capacitor is made to the highest standard.

The long lifetime of our high voltage capacitors is a result of individual quality checks during the winding and assembly process, and the remarkable mechanical strength and protection against corrosion provided by our superior materials and structural design.
