

EFFICIENCY **DOESN'T RUN** **ON GAS OR** **ELECTRICITY.**

You have the power to supply entire cities and regions. But could you use better control over your own organization? Now there's help. SAP for Utilities is an integrated solution that can help you get a handle on everything from generation to customer service. So you can see what's coming and plan for it. You can even improve sales and service offerings to win and retain more customers. And the really good news: it doesn't take as much energy as you think. Visit sap.com/utilities or call 888 727 2955 for details.

THE BEST-RUN BUSINESSES RUN SAP
