

MAGNA
ELECTRIC CORPORATION

The experts in breaker repair and vacuum retrofit

Our fully equipped breaker repair and vacuum retrofit facility allows for maximum life extension of circuit breakers by using the latest technology. Our designs will increase the reliability and overall performance of your distribution system by converting these breakers to vacuum or SF6, complete with solid state protection relays incorporated into the design.

What's more, Magna offers:

- NETA certified technicians
- 24-hour emergency service nation-wide

Manufacturing upgrade and certification of 25 kV outdoor switchgear line up.

Complete rebuild and NETA certification testing on ITE K1600 ACB.

Vacuum retrofit of DB 25 complete with motor protection relay.

Vacuum retrofit of ITE K600 complete with protection relay.
