

PURE METAL GALVANIZING
Canada's Largest Custom Hot Dip Galvanizer and a Leader in Providing Cost-effective Corrosion Protection

From huge switchgear components to small castings and hardware, every part of an article is fully protected with the total immersion zinc 'Hot Dip' Galvanizing process.

ISO 9002 REGISTERED

Pure Metal Galvanizing has three conveniently located facilities in Southern Ontario to meet a variety of zinc galvanizing needs — including centrifuging and 'pickle and oil' processes.

CABLE MASTER INC.
3M/AEMC/HDW Regional Distributor

We specialize in Training and Sales of a full range of 3M/HDW/AEMC equipment

- 3M Dynatel Cable/Pipe/Fault Locators
 - 3M EMS Markers and Locators
 - 3M Confined Space Monitors
 - HDW Fault Locating Equipment and TDRs.
 - New, Demo or refurbished units
 - Lightweight, compact and rugged
 - ISO 9002 Registered
 - We have 35+ years experience
 - Complete line of AEMC instruments
 - Hi-Pot testing 0-130kv DC
 - Fault locate all types of cables
- For Sales/Training/Contract Locates:
 Toll Free: 877-715-7303
 Tel: (416) 804-8799
 Fax: (905) 715-7305
 Email: cablemaster@rogers.com

G.T. WOOD COMPANY LIMITED
High Voltage Electrical Contractor

- High Voltage Preventative Maintenance
- Transformer and Switchgear Repair
- Infra Red Thermography Inspections
- Engineering Design Studies
- Substation Design and Build
- Harmonic Analysis/Power Factor Correction
- Cable Locates and Repairs
- Sales of New and Pre-owned Equipment
- Supply of Temporary Substations
- PCB Management

24 HOUR EMERGENCY SERVICE

FLIR SYSTEMS

Infrared Imaging Systems

FLIR Systems manufactures, sells, rents, calibrates and services infrared imaging systems in Canada.

FLIR Systems combines the strengths of AGEMA and Inframetrics to develop the premier Thermography Solution. The ThermoCAM PM 695 captures both thermal and visual images with autofocus and editable text messaging. After saving over 800 images, simply "drag-n-drop" file into Reporter analysis software and report is complete in seconds.

Please take advantage of our "First-Time" Rental Special. Rent a camera for two weeks and receive the third week at no charge.

Certification Training is available.

ADVANCED CONTROL INC.

Systems at Your Fingertips
Integrated Protection, Control and Metering

Tel: (519) 686-8722 Fax: (519) 686-1486
www.esac.com

Providing turnkey integrated solutions for utilities and industries specializing in electrical power systems automation and SCADA. Projects consist of design, development and implementation for system arrangements of PLCs, RTUs, IEDs (Intelligent Electronic Devices), SCADA PC based HMI software, LAN/WAN communications and relational databases.

From the substation to the web user for real-time and historian data.

ESAC leads the industry in innovative integrated system solutions based on technology, service and value.

**ACCESS CONTROL SALES
3-Phase Monitors Catalogue**

Time Mark Corporation's expanded version of the PM-310 specialty catalogue contains information on the company's popular line of phase loss monitors. The 24 page book contains descriptions, photos, dimensional drawings, specifications and typical application diagrams for each device. Also included is a cross reference chart of available models, and answers to commonly asked questions.

**Rittal Power Distribution
SV Busbar Systems**

SV Busbar Systems from Rittal are the ideal solution for power distribution needs ranging from 250A to 3000A.

SV systems are available with either flat copper busbar or Rittal profile busbar. The profile busbar is already cut to length to suit the enclosure. The SV Busbar System is designed so that system designers and manufacturers can quickly and simply build their own power distribution systems in-house cost effectively.

For systems with motor contactors, motor circuit breakers and miniature circuit breakers, SV Busbar Systems will increase free internal enclosure space, reduce assembly time by 40% and increase design flexibility.

For maximum flexibility SV Busbar Systems are available fully shrouded for high level protection. For expansion at a later date motor starters and contactors can be incorporated from leading manufacturers such as Telemecanique, Siemens, Allen Bradley, Moeller Electric and many more.

rising system costs are a thing of the past

Rittal's Power Distribution range of component adaptors for contactors, motor circuit breakers and miniature circuit breakers from 1 amp up to 250amps, provides system designers and manufacturers with the ability to increase design flexibility as well as reduce costs.

As the component adaptors mount directly onto flat or profile busbars, and are already pre-wired, the amount of time required to install a combined contactor and motor circuit breaker is normally less than 5 minutes, compared with conventional wiring that can take up to 30 minutes.

Rittal's component adaptors are designed to integrate with a wide range of leading manufacturers of control equipment, from Telemecanique, Siemens, Allen Bradley to Klockner Moeller and many more. The component adaptors are available pre-wired or with terminals for self-wiring making installation costs obsolete.

For more information about our Power Distribution components, log on to www.rittal.ca or email us at sales4@rittal.ca or Tel: 1-800-399-0748

Hubbell Canada Inc. ALTD06200R0051

Chance Line Tension Disconnects

The **Chance Line Tension Disconnects** are single phase Hook-stick operated switches available for voltages up to 38kV, 200kV BIL and 600 amps continuous current. The **ALTD** Switch features lightweight ESP Insulators, low profile design, rigid copper blade, integral corona ring and rugged end fittings.

Now they are available with separate mechanical and electrical NEMA pads.
