

**SCHWEITZER ENGINEERING LABORATORIES, INC.**  
**SEL-547 Distributed Generator Interconnection Relay**

Schweitzer Engineering Laboratories, Inc. introduces the SEL-547 Distributed Generator Interconnection Relay, designed to provide utility-grade protection of distributed generation (DG)/utility system connections.

Although distributed generator systems have a built-in control system for normal operation, the efficient, low-cost SEL-547 Relay protects against abnormal conditions when using the distributed generator in all operating modes including peak shaving, base loading, islanding, and emergency backup.

**THE ELECTRICITY FORUM**  
 Offering Technical Publications With  
 Information On Today's Leading  
 Electrical Issues

The Electricity Forum has over 15 years experience in publishing technical books which provide up-to-date information to electrical industry professionals on the many issues involved in the design, operation and maintenance of modern electrical equipment and systems.

Our books provide information on the latest issues and technologies that electrical industry professionals want to understand. Each book contains a variety of papers and articles, written by some of North America's leading experts on electrical industry issues. In addition, each book will include a directory of companies offering products and services related to the book subject.

Visit our website bookstore to view the complete list of available publications, [www.electricityforum.com](http://www.electricityforum.com)
